Profile Summary

Motivated Computer Science undergraduate with hands-on experience across 10+ projects in domains including blockchain, AI applications, and full-stack development. Strong foundation in software engineering principles with specialized knowledge in networking and cybersecurity. Proficient in Java, Spring Boot, and modern development tools, with demonstrated problem-solving skills through 300+ LeetCode challenges. Seeking a Developer position to apply technical skills and contribute to innovative software solutions.

Technical Skills

Programming Languages & Databases: Java, Python, SQL, NoSQL (MongoDB), JavaScript/Node.js

Frameworks & Platforms: Spring Boot, Spring AI, Android SDK

Development Tools: Git, Postman, Android Studio

Cybersecurity & Networking: TCP/IP, Network Security, Penetration Testing (NMAP, SQLMap), Linux Administration

Problem Solving: LeetCode (300+ Problems Solved) – Data Structures & Algorithms

Projects

Decentralized DNS System — Blockchain, Distributed Systems

- Designed and implemented a blockchain-based decentralized DNS system using peer-to-peer architecture, eliminating single points of failure in domain resolution.
- Engineered a custom round-robin consensus mechanism with timeout protocols to ensure transaction consistency for domain operations across distributed nodes.
- Implemented secure node admission through voting-based validation and on-chain transaction logic to maintain data integrity and prevent sybil attacks.

RAG-Powered SQL Query Generator — Spring Boot, Spring AI, Ollama (Llama 3.2)

- Developed a RAG application using Spring AI and Llama 3.2 to translate natural language questions into accurate SQL queries via database schema embeddings.
- Engineered a semantic retrieval pipeline with Ollama-generated embeddings, ensuring context-aware SQL generation while implementing robust security against injection attacks.
- Built a secure backend with input validation and SELECT-only restrictions, paired with a lightweight HTML interface for user interaction and result presentation.

Education

Bachelor of Technology in Computer Science

Expected March 2026

Anil Neerukonda Institute of Technology and Sciences

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Web Technologies

Diploma in Computer Science & Engineering

March 2023

Government Polytechnic, Srikakulam

Relevant Coursework: Programming in C, Object-Oriented Concepts, Web Design Fundamentals, Computer Fundamentals
